

VAV-Compact unit – with VAV controller, dynamic Δp sensor and damper actuator

- Field of application: VAV units in comfort applications
- Application: VAV/CAV, position control
- Belimo D3, dynamic flow sensor
- Functional range differential pressure 0...500 Pa
- Control communicative, modulating (0/2...10 V)
- Communication via Belimo MP-Bus
- Conversion of sensor signals
- Tool connection: Service socket, NFC interface

Technical data

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2...28.8 V / DC 21.6...28.8 V
	Power consumption in operation	2 W
	Power consumption in rest position	1 W
	Power consumption for wire sizing	4 VA
	Inrush current (I _{max})	8.0 A @ 5 ms
	Connection supply / control	Cable 1 m, 4x 0.75 mm ²
Data bus communication	Communicative control	MP-Bus
	Number of nodes	MP-Bus max. 8
Functional data	Torque motor	5 Nm
	Operating range Y	2...10 V
	Input impedance	100 kΩ
	Operating range Y variable	0...10 V
	Position feedback U	2...10 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	Start point 0...8 V End point 2...10 V
	V' _{max} adjustable	20...100% of V' _{nom}
	V' _{mid} adjustable	>V' _{min} ...<V' _{max}
	V' _{min} adjustable	0...100% of V' _{nom} (<V' _{max})
	Manual override	with push-button, can be locked
	Angle of rotation	95°
	Angle of rotation note	adjustable mechanical or electrical limitation
	Mechanical interface	Universal shaft clamp 6...20 mm
	Position indication	Mechanical
Measuring data	Measuring principle	Belimo D3, dynamic flow sensor
	Installation orientation	position-independent, no zeroing necessary
	Functional range differential pressure	0...500 Pa
	Maximum system pressure	1500 Pa
	Burst pressure	±5 kPa
	Height compensation	Adjustment of system height (range 0...3000 m above sea level)
	Condition measuring air	0...50°C / 5...95% RH, non-condensing
	Pressure tube connection	Nipple diameter 5.3 mm
Safety data	Protection class IEC/EN	III, Protective Extra-Low Voltage (PELV)
	Degree of protection IEC/EN	IP54

Technical data

Safety data	Degree of protection NEMA/UL	NEMA 2
	Housing	UL Enclosure Type 2
	EMC	CE according to 2014/30/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	Type of action	Type 1
	Rated impulse voltage supply / control	0.8 kV
	Pollution degree	3
	Ambient humidity	Max. 95% RH, non-condensing
	Ambient temperature	0...50°C [32...122°F]
	Storage temperature	-20...80°C [-4...176°F]
	Servicing	maintenance-free
Weight	Weight	0.45 kg

Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Application	The VAV-Compact unit is used for comfort applications for pressure-independent control of VAV units. See Technical brochure – VAV-Compact product range for volumetric flow applications.
	Pressure measurement
	The integrated differential pressure sensor is also suitable for very small volumetric flows. The maintenance-free sensor technology enables a wide range of applications in the HVAC comfort area such as in residential buildings, offices, hotels, etc.
	Actuators
	For the various applications and damper designs, various actuator variants with torque 5, 10 or 20 Nm are available to the VAV unit manufacturer.
	Control functions
	Volumetric flow (VAV/CAV) or position control (Open Loop)
	Application Variable Air Volume (VAV)
	Variable air volume control in the V'min...V'max range, demand-dependent via a modulating reference variable (analogue or bus), e.g. room temperature or CO ₂ controller for energy-saving air conditioning of individual rooms or zones.
	V'nom, Δp @ V'nom
Application Variable Air Volume (VAV)	OEM-specific calibration parameters, suitable for the VAV unit
	Adjustment range Δp @ V'nom: 38...450 Pa
	V'max (Max)
	Maximum operating volumetric flow, adjustable 20...100% V'nom
	V'min (Min)
Application Variable Air Volume (VAV)	Minimum operating volumetric flow, adjustable 0...100% V'nom

Product features

- Application Constant Air Volume (CAV)** Constant volumetric flow control. If required, via step switching (switching contacts) for constant volumetric flow applications.
Steps: CLOSE / Min / Max / OPEN (Mid)
- Application Position Control (Open Loop)** Position control for integration of the VAV-Compact into an external VAV control loop. Transmitter and actuator unit.
Max
Range: 20...100 % rotation range
Min
Range: 0...100 % rotation range
- Demand Controlled Ventilation (DCV)** Output of the demand signal (damper position) to the higher-level automation system – DCV function.

Bus operation Thanks to its MP-Bus functionality, the VAV-Compact can be easily integrated into a MP-Bus system. The communication interface and MP address is defined using service tools.
In bus mode, a sensor (0...10 V / passive) can optionally be connected, e.g. a temperature sensor or a switching contact, for integration into the higher-level bus system.

Operating settings Control functions
Volumetric flow (VAV/CAV) or position control (Open Loop)
Operating settings Min/Max/Nom

Operating and service tools Belimo Assistant 2 or ZTH EU

Accessories

Tools	Description	Type
	Service tool for wired and wireless setup, on-site operation and troubleshooting.	Belimo Assistant 2
	Service tool, with ZIP-USB function, for configurable and communicative Belimo actuators, VAV controller and HVAC performance devices	ZTH EU
	Connecting cable 5 m, A: RJ11 6/4 LINK.10, B: 6-pin for connection to service socket	ZK1-GEN
	Connecting cable 5 m, A: RJ11 6/4 LINK.10, B: free wire end for connection to MP/PP terminal	ZK2-GEN
	Belimo Assistant Link Bluetooth and USB to NFC and MP-Bus converter for configurable and communicative devices	LINK.10
Electrical accessories	Description	Type
	Positioner for wall mounting	CRP24-B1
	Positioner for wall mounting	SGA24
Gateways	Description	Type
	Gateway MP to BACnet MS/TP	UK24BAC
	Gateway MP to Modbus RTU	UK24MOD

Electrical installation

Supply from isolating transformer.

Wire colours:

- 1 = black
- 2 = red
- 3 = white
- 5 = orange

MP-Bus

AC/DC 24 V, modulating

Parallel operation

- Max. 8 actuators in parallel
- Parallel operation is permitted only on non-connected axes
- Do not fail to observe performance data with parallel operation

Primary/secondary operation

Further electrical installations
MP-Bus

Connection on the MP-Bus

Max. 8 MP-Bus nodes

Connection of active sensors

- Supply AC/DC 24 V
- Output signal 0...10 V (max. 0...32 V)
- Resolution 30 mV

Connection of external switching contact

- Switching current 16 mA @ 24 V
- Start point of the operating range must be configured on the MP actuator as ≥ 0.5 V

Connection of passive sensors

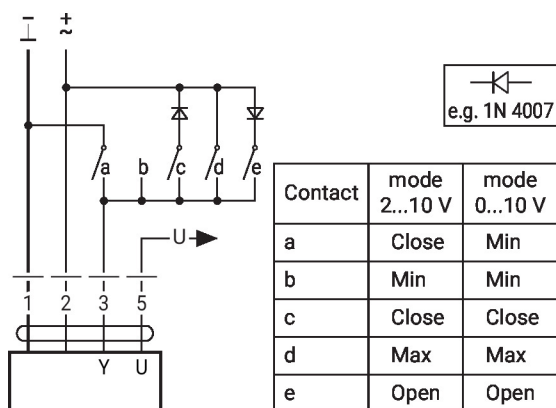

Ni1000	-28...+98°C	850...1600 Ω ²⁾
PT1000	-35...+155°C	850...1600 Ω ²⁾
NTC	-10...+160°C ¹⁾	200 Ω ...60 k Ω ²⁾

- 1) Depending on the type
2) Resolution 1 Ohm
Compensation of the measured value is recommended

Further electrical installations
Functions with specific parameters (configuration necessary)

CAV function, Belimo Assistant 2 setting: CLOSE - V'min - V'max (shut-off level 0.1 V)

- Note that the contacts are mutually interlocking
- DC 24 V supply: option c and d not available
- Setting for CAV application: mode 2...10 V, shut-off level 0.1 V

CAV function, Belimo Assistant 2 setting: CLOSE - V'min - V'mid - V'max (NMV-D2M-compatible)

- Note that the contacts are mutually interlocking
- Setting parameters for CAV application: V'min - V'mid - V'max (NMV-D2M-compatible)

Parameter and tool overview

Settings and tool function

			Tool			
			ZTH EU	PC-Tool	Assistant app	
Designation	Setting values, limits, explanations	Units				Remarks
System-specific data

Operating controls and indicators

1 Push-button and LED display green

- Off: No power supply or malfunction
- On: In operation
- Press button: Triggers angle-of-rotation adaptation, followed by standard mode

2 Push-button and LED display yellow

- Off: Standard mode
- On: Adaptation or synchronisation process active
- Flickering: MP-Bus communication active
- Flashing: Request for addressing from MP client
- Press button: Confirmation of the addressing

3 Manual override button

- Press button: Gear train disengages, motor stops, manual override possible
- Release button: Gear train engages, synchronisation starts, followed by standard mode

4 Service plug

For connecting configuration and service tools

Check power supply connection

- 1** Off and **2** On Possible wiring error in power supply

Installation notes

- Installation situation** Mounting VAV-Compact control equipment:
- The VAV-Compact is assembled, set and calibrated on the VAV unit in the factory by the VAV unit manufacturer.
- Installation of the VAV unit:
- The VAV unit must be installed according to the specifications of the VAV unit manufacturer.
- Installation specification Δp sensor:
- No restrictions, but it must be avoided that any condensation can run into the sensor and remain there.
- Accessibility of control equipment:
- Accessibility to the control equipment must be guaranteed at all times.
- Pressure tube connections:
- The pressure tube connections must not come into contact with liquids or greasing agents of any kind, this includes any residue inside or on the surface of the pressure tubes.
- Servicing** Cleaning work during installation, commissioning or maintenance
- Belimo VAV devices are maintenance-free. We recommend dry removal of dust from the outside of the housing if necessary.
- The duct system and the VAV units are maintained on the occasion of the cleaning intervals required by law or by the specific system. Please observe the following points.
- Cleaning work on the damper, differential pressure pickup devices and pressure tubes
- When cleaning the duct system or the VAV unit, remove the pressure tubes on the VAV controller so that it will not be affected.
- Using compressed air, e.g. blowing out the differential pressure pickup devices or pressure tubes
- Before doing this work, disconnect the differential pressure pickup devices or pressure tubes from the differential pressure sensor.
- Connecting the pressure tubes
- To ensure the correct installation of the pressure tubes, we recommend marking them with + or – before disassembly.

Service

Using Belimo Assistant 2, device parameters can be modified. Belimo Assistant 2 can operate on a smartphone, tablet or PC. The available connection options vary depending on the hardware on which Belimo Assistant 2 is installed.

For more information about Belimo Assistant 2, refer to the Quick Guide – Belimo Assistant 2.

Service

Wireless connection Belimo devices marked with the NFC logo can be accessed either directly with an NFC-capable smartphone or with a Bluetooth-capable smartphone connected to Belimo Assistant Link.

Requirement:

- NFC- or Bluetooth-capable smartphone or tablet
- Belimo Assistant 2 (Google Play and Apple AppStore)

Align the NFC-capable smartphone or Belimo Assistant Link with the device's NFC logo so that both NFC antennas are superposed.

Wired connection Belimo devices can be accessed by connecting Belimo Assistant Link to the USB port on a PC or laptop and to the MP-Bus wire on the device.

Belimo Assistant 2 acts as MP client. Therefore, no other MP client shall be connected to the device.
